Floor Plan

Lighting Elevations

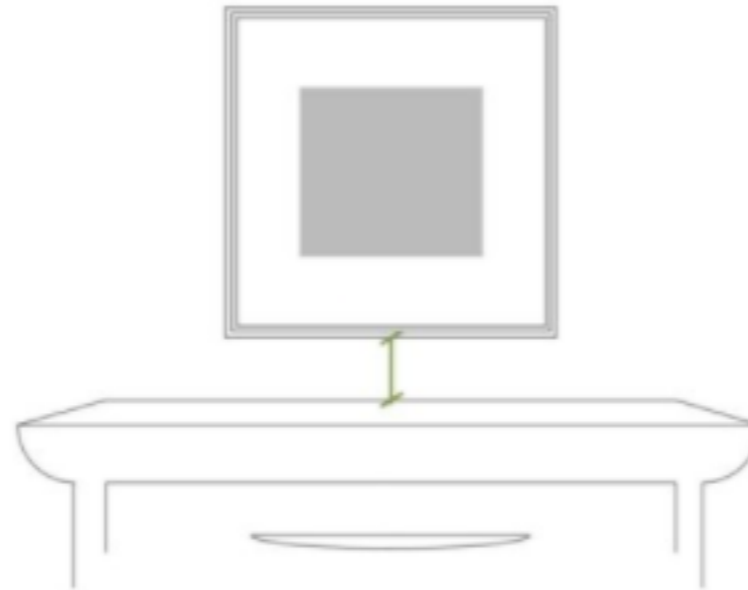

We recommend leaving approximately 30"-36" between the bottom of your fixture and the surface of your dining table.

When installing multiple wall sconces, consider leaving 8'-10' between each fixture for balanced spread of light. Using the center point of the fixture, most wall sconces should be hung at eye level or 60"-72", dependent on wall height and sconce style.

Art Elevation

We recommend hanging art so the midpoint is between 57" and 60" from the floor. If your room's ceilings are higher than eight feet you can use a midpoint of 60"-70" from floor.

If hanging art above a piece of furniture leave a distance of between 3"-6" from the top of the furniture as your guide.
